ADMINISTRATOR REPORTS

Admin Dashboard

The **Admin Dashboard** is the central hub for district and school leaders to oversee reading progress, monitor usage, and manage Amira's implementation. From here, administrators can adjust settings at the district or school level and access data spanning districts, schools, classes, grades, and individual students.

How to Use This Report: Start here each week to check assessment status, usage, and outcomes district-wide, then click into any linked report for a closer look at the data behind it.

View a walkthrough

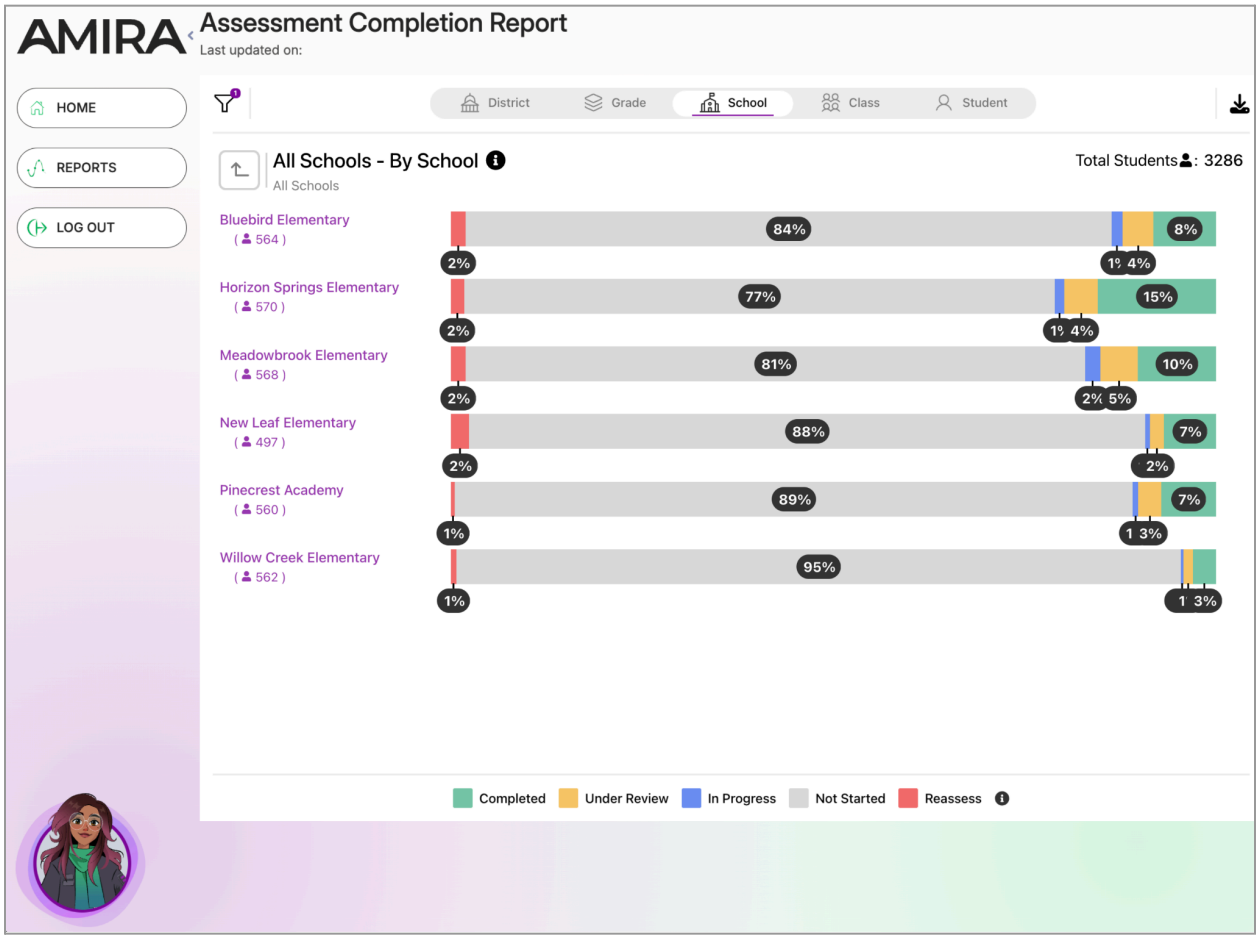

Assessment Completion Report

The **Assessment Completion Report** tracks the percentage of students who have completed their Benchmark and Progress Monitoring assessments within a selected testing window, with flexible views by district, school, grade, class, or individual student. *Updates overnight.*

How to Use This Report: Administrators use this report to monitor assessment participation, identify gaps in completion, and follow up with schools or classes before a testing window closes.

View a walkthrough

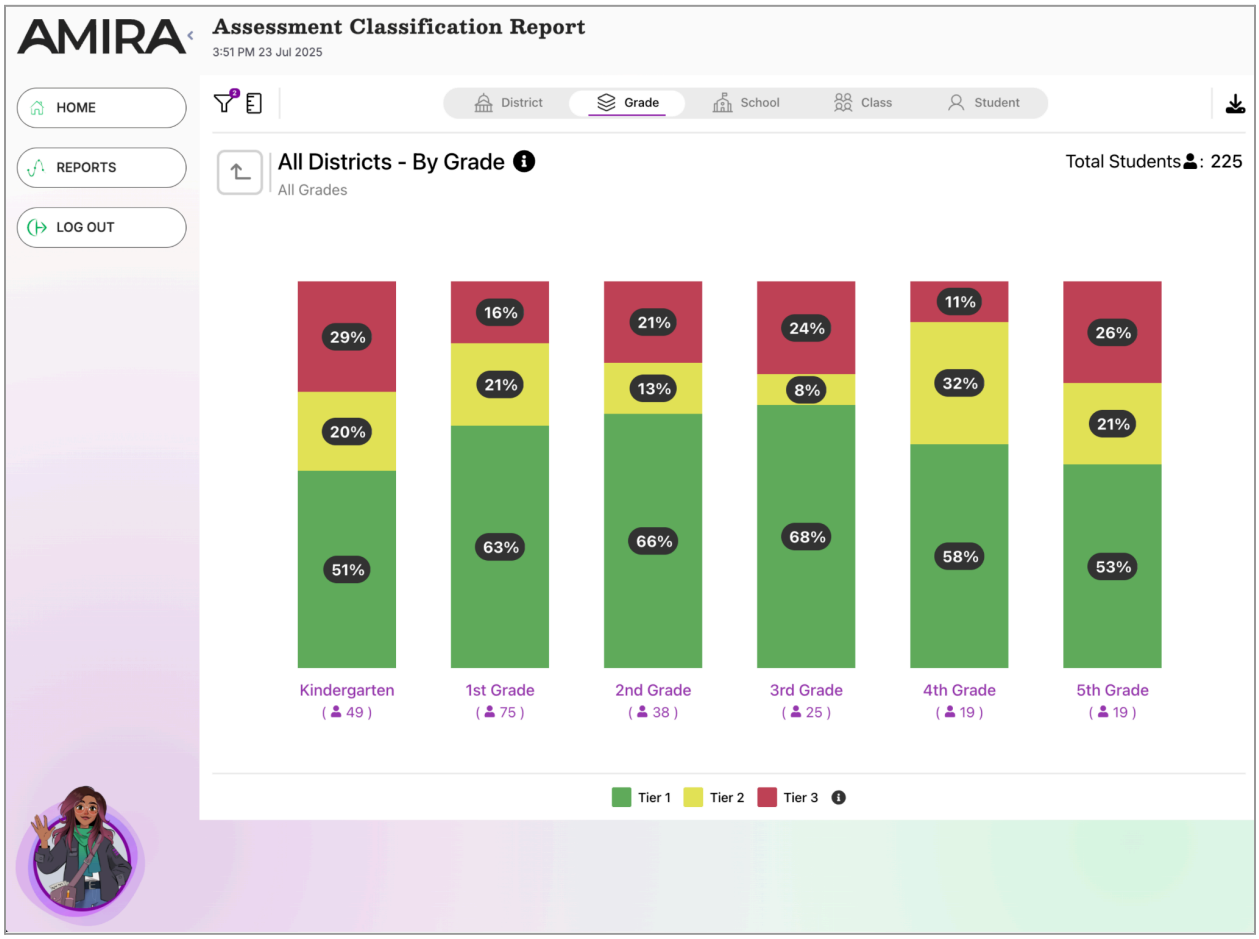

Assessment Classification Report

The **Assessment Classification Report** shows the percentage of students in each performance tier, using measures such as ARM score and domain subscores, with flexible views by district, school, grade, or class. *Updates over the weekend.*

How to Use This Report: Administrators use this report to identify performance patterns, compare results across schools or grades, and support instructional planning at scale.

View a walkthrough

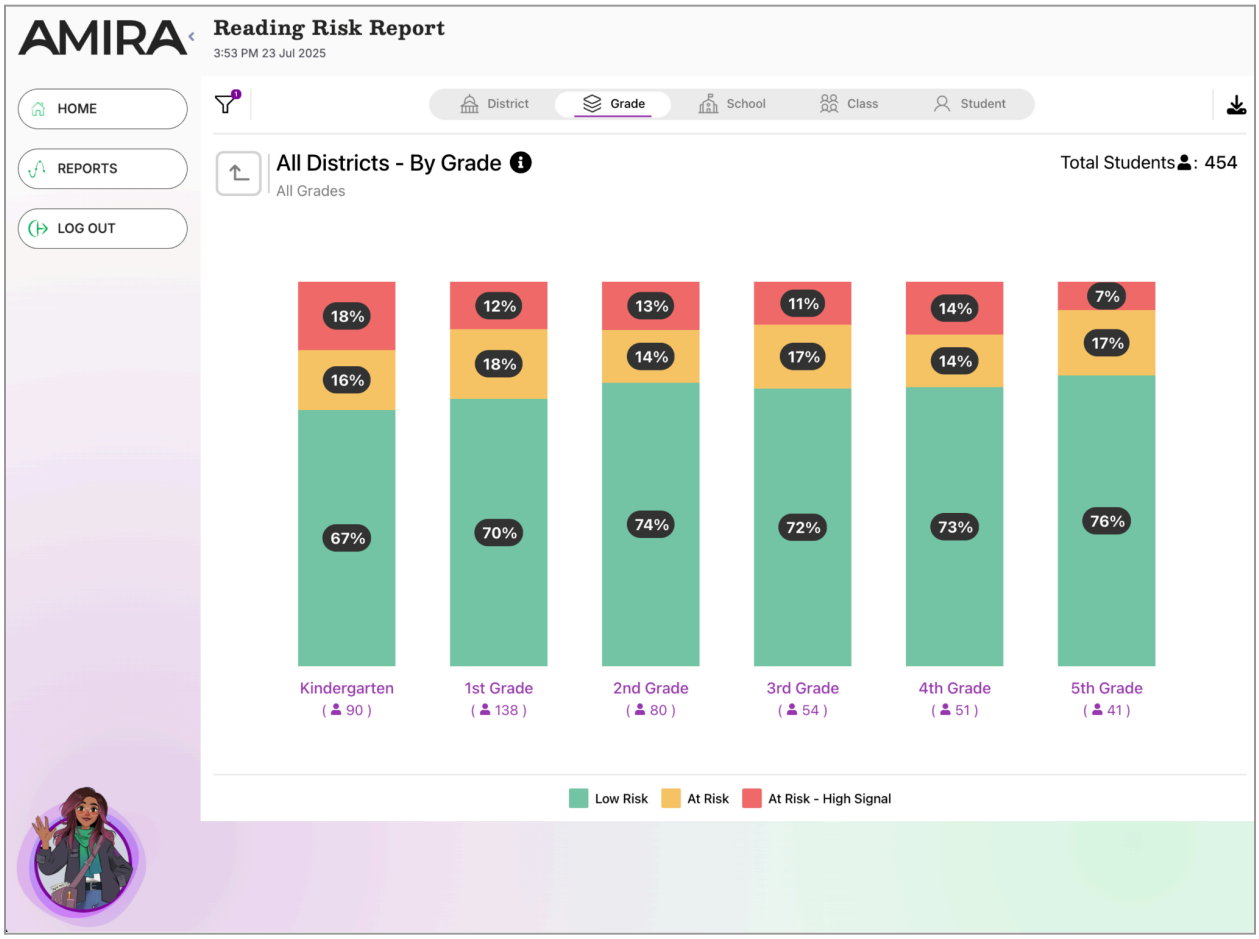

Reading Risk Report

The **Reading Risk Report** gives administrators a district-wide overview of students' reading risk levels, helping identify students who may be at risk for reading difficulties, including dyslexia, with flexible views by district, school, grade, class, or student. *Updates over the weekend.*

How to Use This Report: Administrators use this report to monitor early warning indicators, allocate resources effectively, and support data-driven intervention planning across schools or classrooms — a critical tool for ensuring no student falls through the cracks.

View a walkthrough

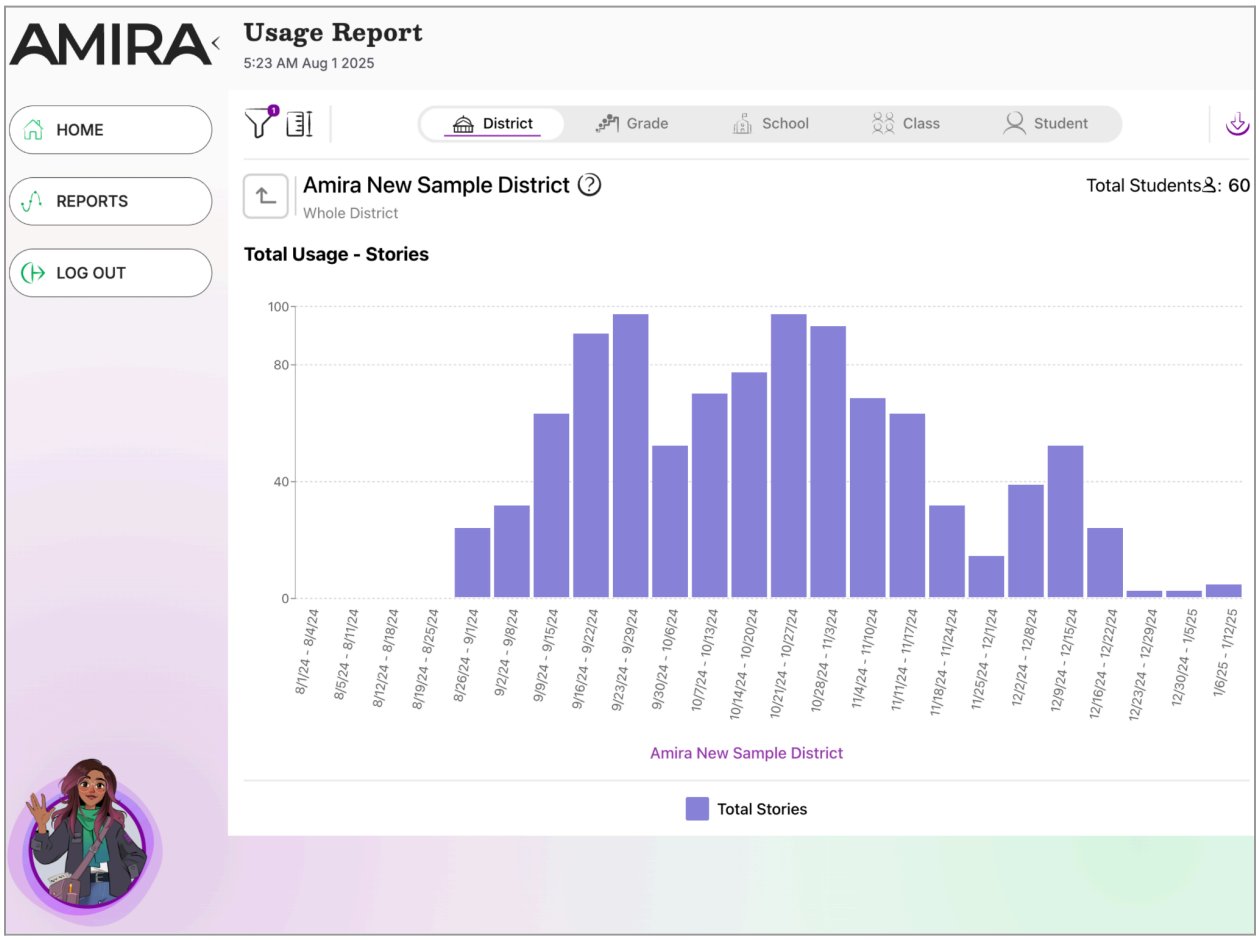

Usage Report

The **Usage Report** gives administrators a weekly snapshot of student engagement with Amira, tracking progress toward recommended usage goals. Research shows students who complete 30 minutes per week with Amira achieve optimal reading growth. The report shows the percentage of students meeting the usage target along with total usage data. *Updates overnight.*

How to Use This Report: Administrators use this report to track student engagement, monitor progress toward usage goals, and ensure effective implementation for optimal reading growth.

View a walkthrough

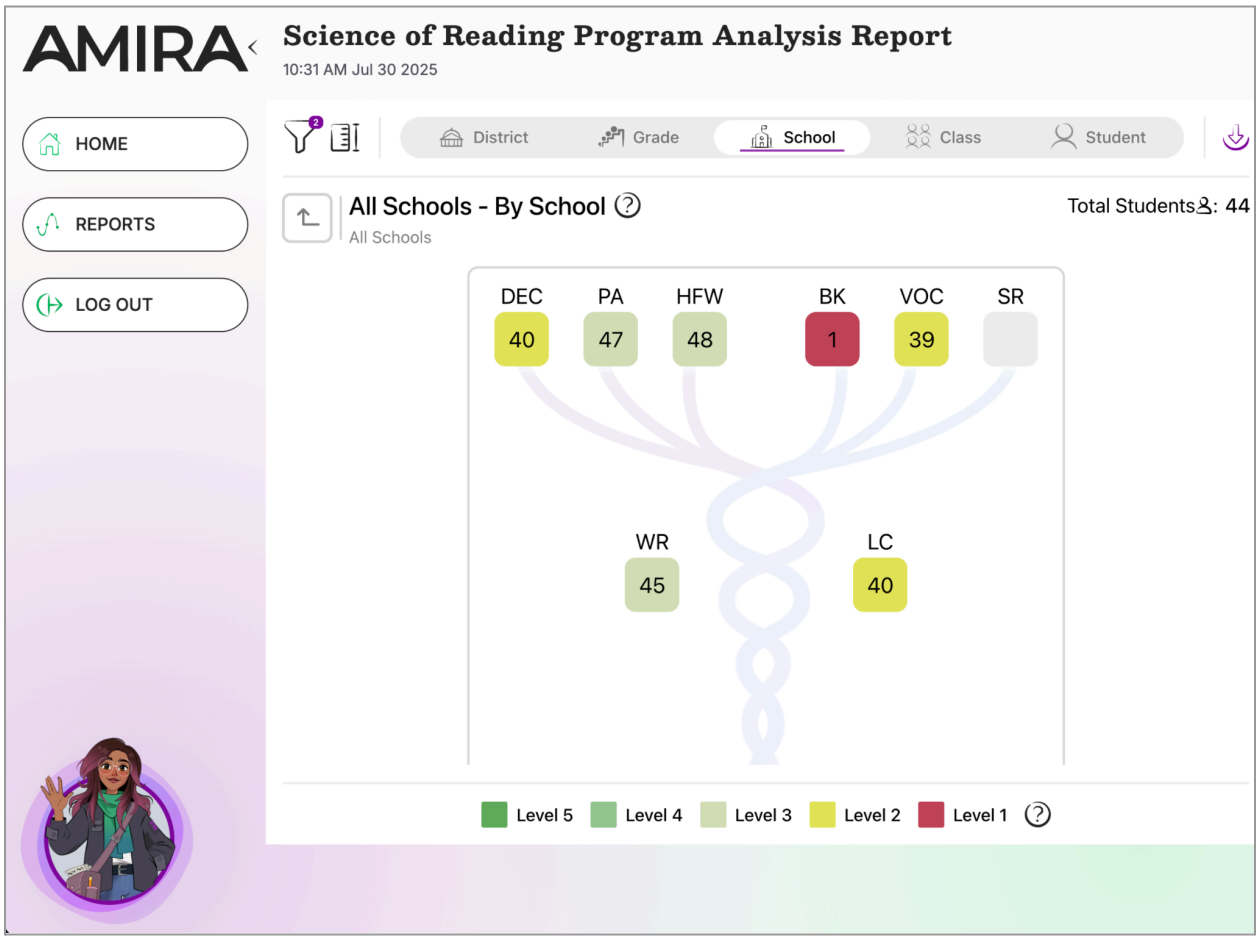

Science of Reading Program Analysis Report

The **Science of Reading (SoR) Program Analysis Report** visualizes reading proficiency across the district, aligned with Scarborough's Reading Rope framework. It weaves together six dimensions of reading ability — phonological awareness, decoding, high frequency words, vocabulary, background knowledge, and structures and reasoning — into word recognition and comprehension scores, which together form an overall mastery score. *Updates over the weekend.*

How to Use This Report: Administrators use this report to view district-wide reading proficiency at a glance, identify strengths and gaps across essential literacy skills, and shape strategic planning and literacy initiatives.

View a walkthrough

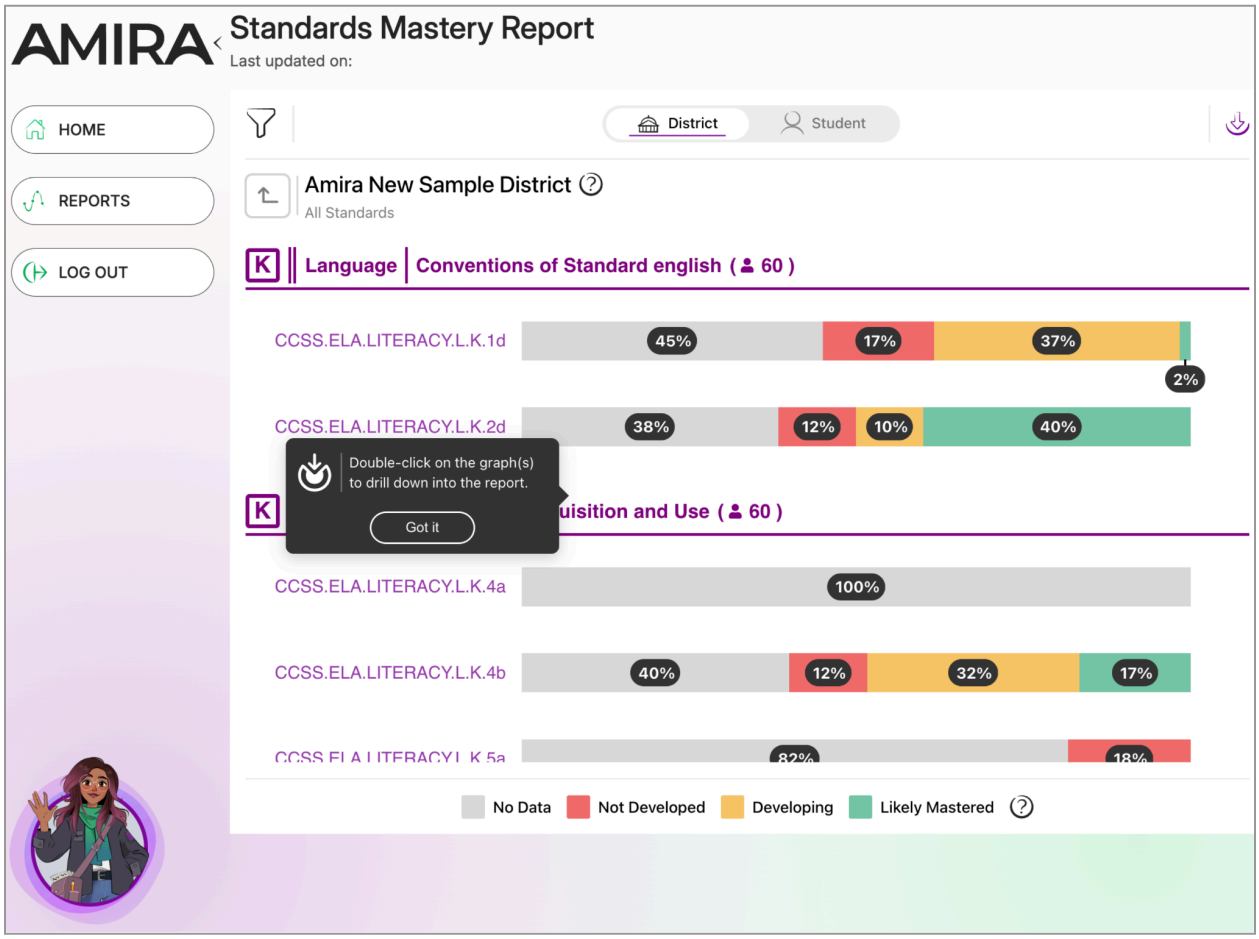

Standards Mastery Report

The **Standards Mastery Report** gives administrators a detailed, criterion-referenced view of student proficiency across state reading standards at the district, school, class, and individual student levels, by grade.

How to Use This Report: Administrators use this report to monitor reading proficiency on state-aligned standards, identify learning gaps, and make data-driven decisions to advance district-wide initiatives.

View a walkthrough

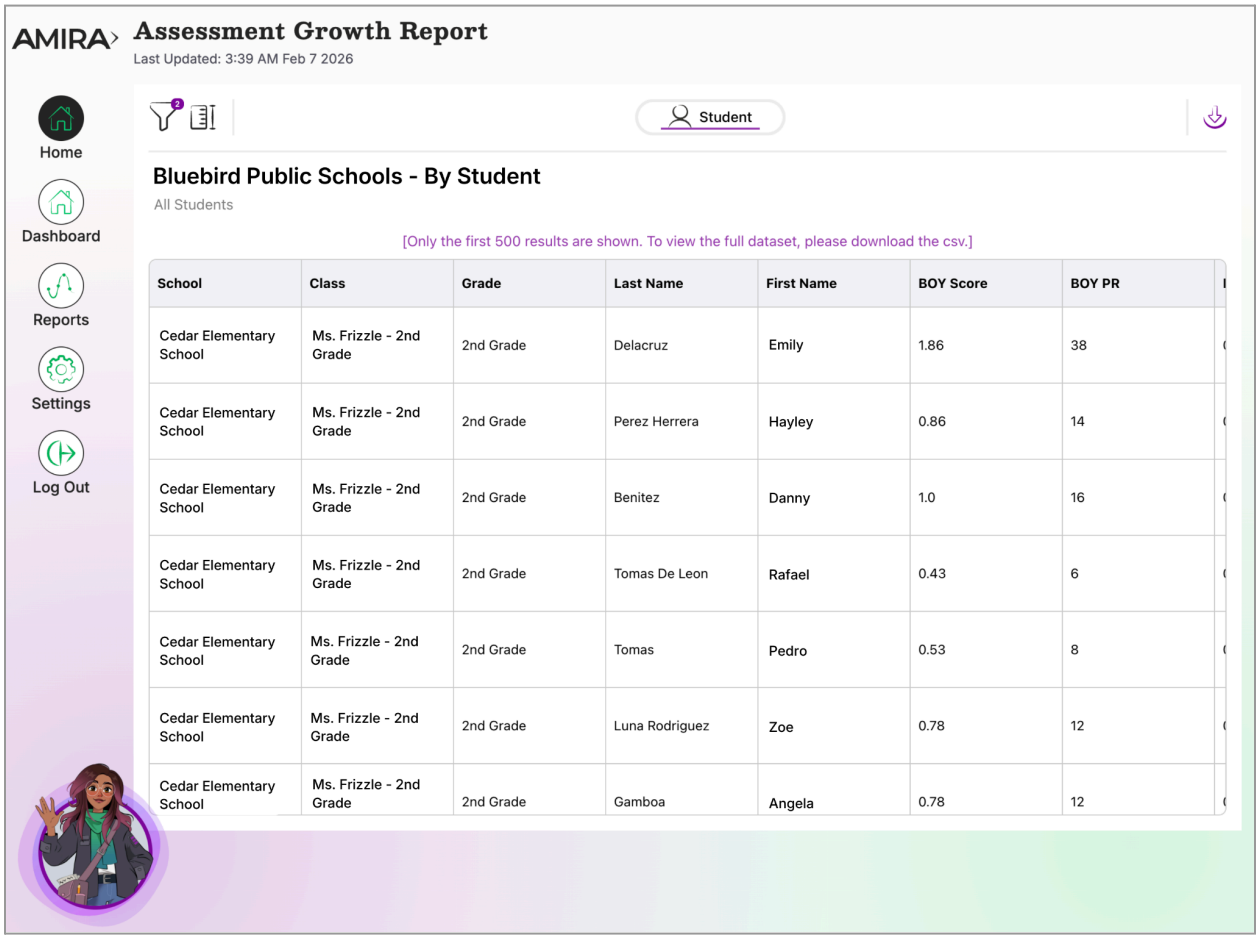

Assessment Growth Report

The **Assessment Growth Report** lets administrators view growth between assessments by presenting ARM Score, Percentile Ranking, Tier, and Estimated Mastery for every student in each assessment period. It also flags "suspicious audio" to help administrators identify students who may need reassessment. Access to this report is available mid-year and upon request through your Success Manager. *Updates over the weekend.*

How to Use This Report: Administrators use this report to review growth for every student in a school or district, download results to a CSV for further analysis, and flag possible audio issues that may require a reassessment.

View a walkthrough

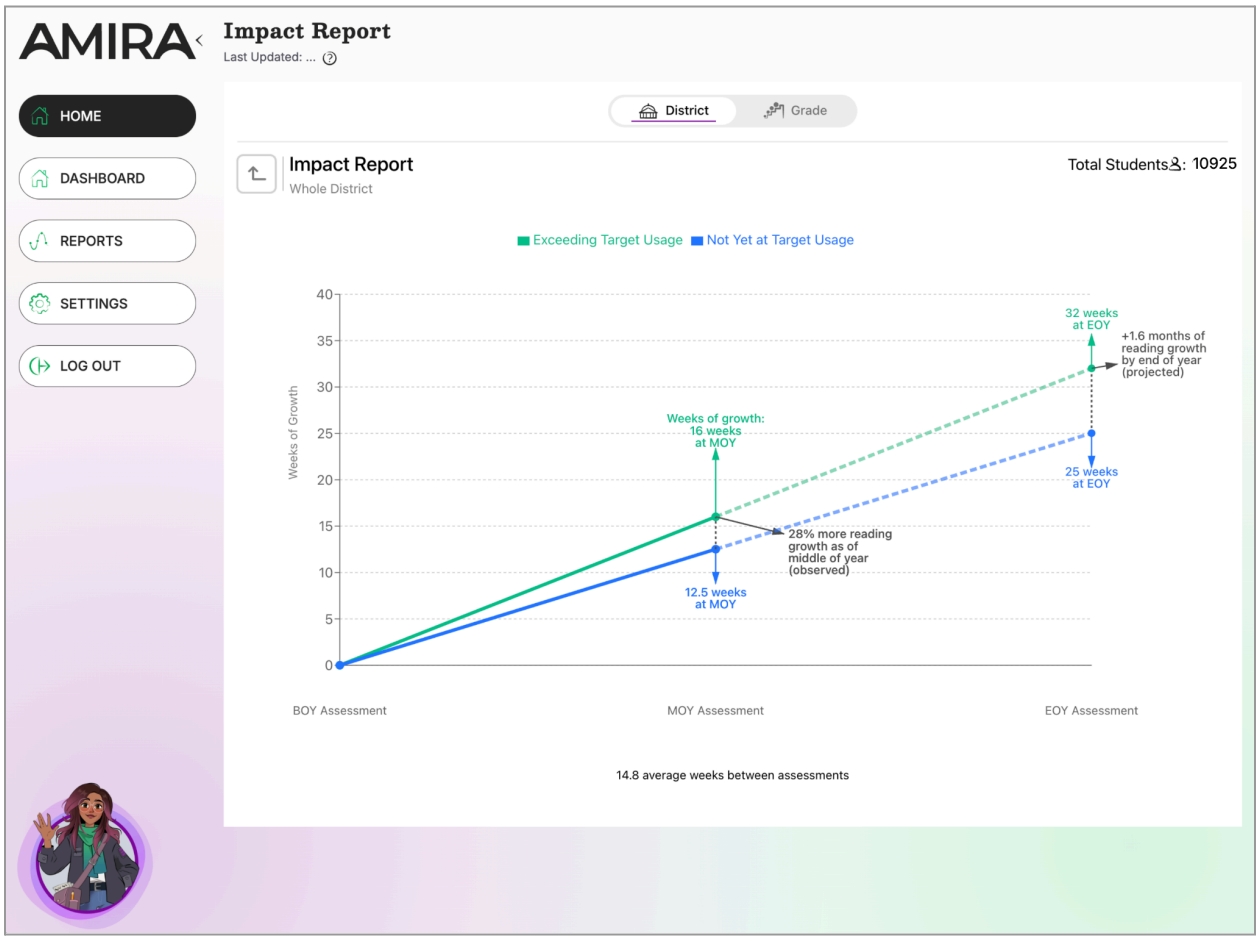

Impact Report

The **Impact Report** compares reading growth (measured in weeks of ARM score improvement) between students who meet Amira's recommended usage target and those who don't, showing whether higher engagement leads to faster reading development. Dotted lines project future growth if students continue on their current usage trajectory. Access to this report is available mid-year and upon request through your Success Manager. *Updates over the weekend.*

How to Use This Report: Administrators use this report to see whether higher Amira usage is driving faster reading growth, and to make the case for consistent implementation across schools and grades.

ADMINISTRATOR CONFIGURATIONS

Assessment Configuration

The **Assessment Configuration** tile lets administrators customize the Amira ISIP Assessment to align with district goals, state requirements, and student needs. Admins can select a predefined configuration or adjust tasks by grade level, including options for the Rapid Automatized Naming (RAN) task and language preferences. Admins can also set role-based controls, providing or limiting access to specific assessment settings.

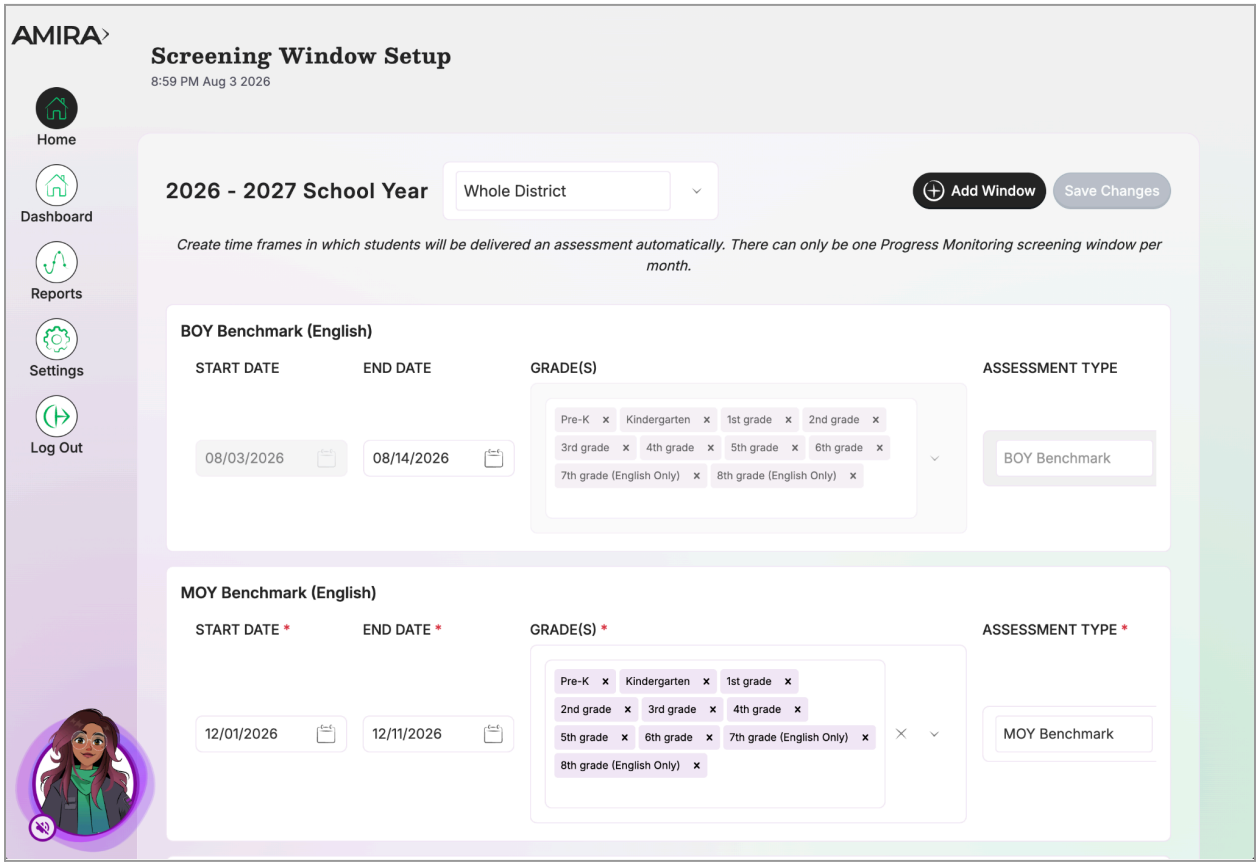

View a walkthrough

Screening Windows

The **Screening Windows** tile lets administrators set and manage when students complete their assessments throughout the year. Admins can choose a three-times-per-year or monthly assessment schedule, then customize screening windows by school, grade level, assessment type, and language. This supports both Benchmark and Progress Monitoring assessments.

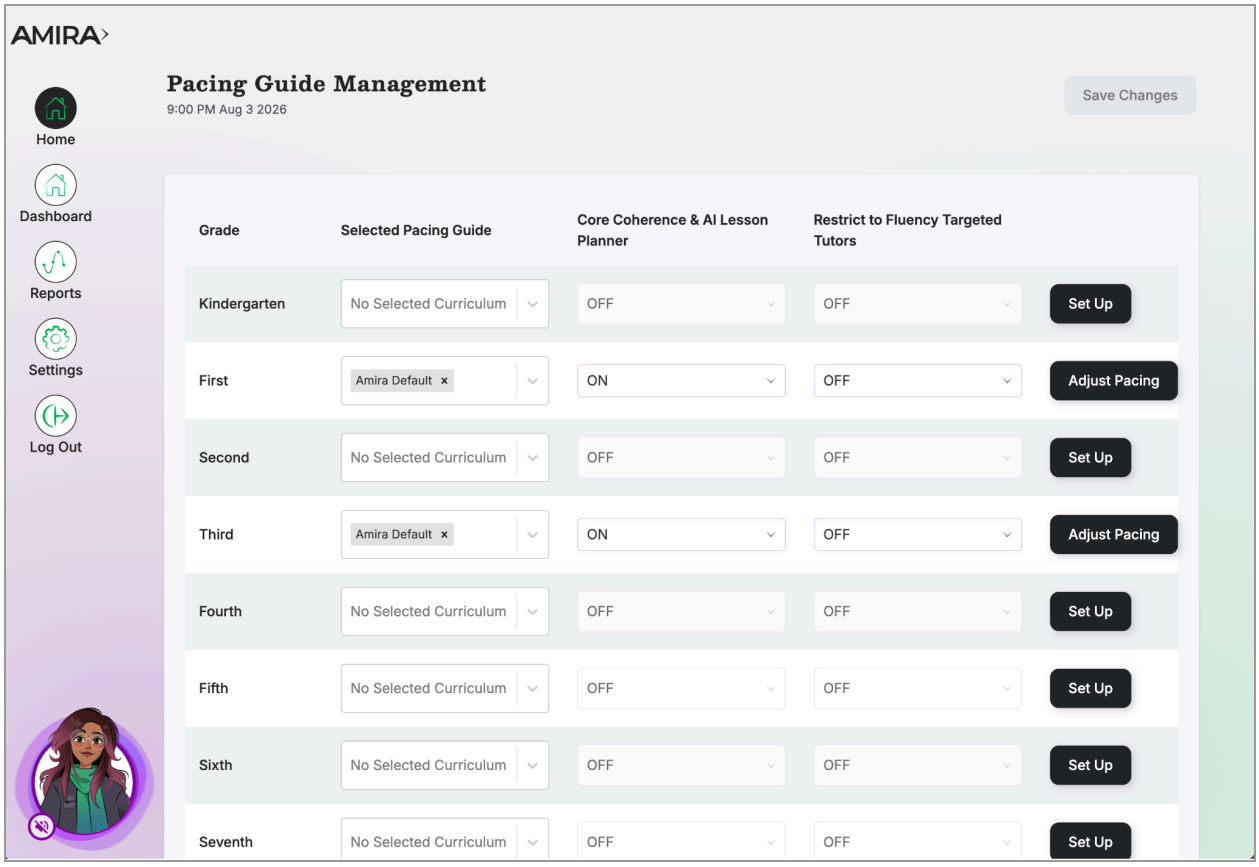

View a walkthrough

Curriculum Management

The **Curriculum Management** tile lets administrators select and customize grade-level curricula to align with district goals. Admins can enable micro-lessons and AI Lesson Planner access, assign aligned text sets, restrict fluency-targeted tutor stories, and adjust pacing, lesson order, and dates within the scope and sequence.

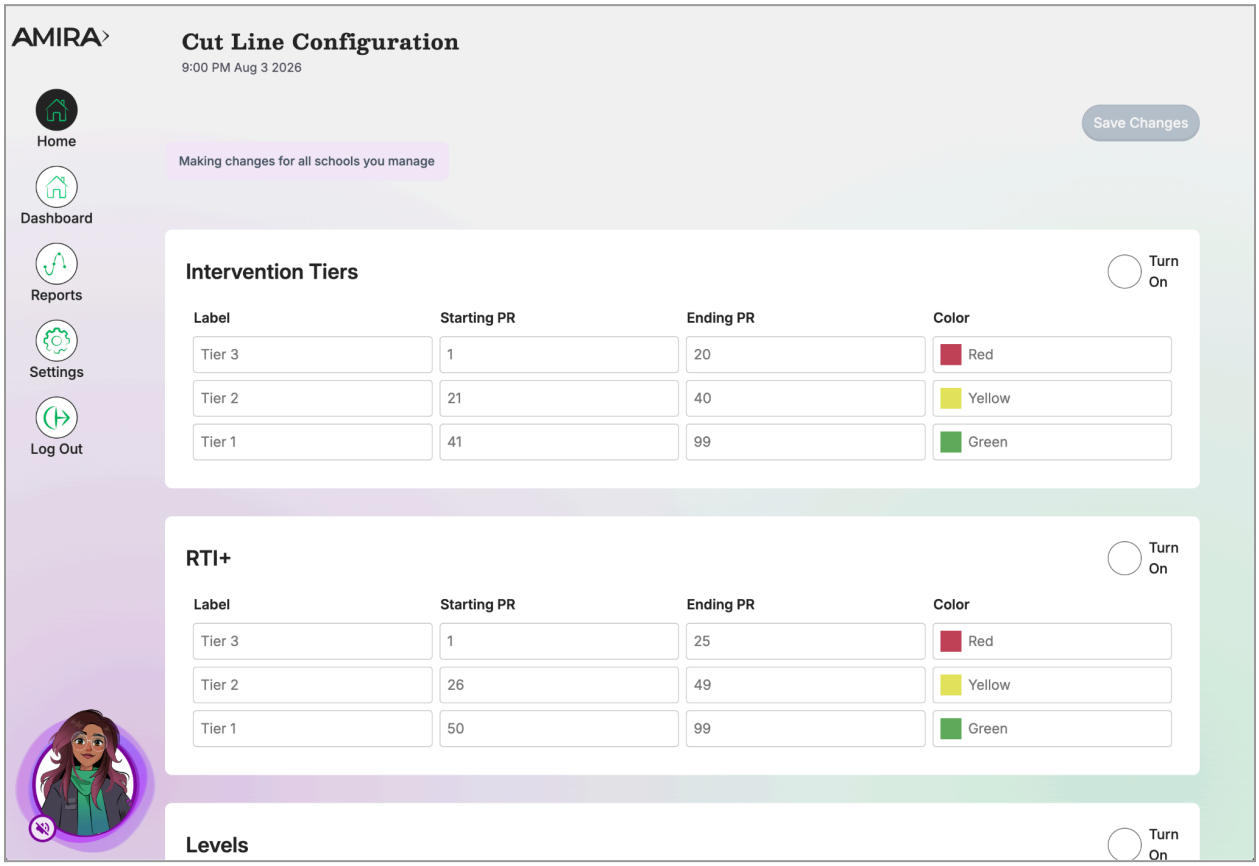

View a walkthrough

Cut Line Configuration

The **Cut Line Configuration** tile lets administrators define district thresholds for proficiency levels shown on teacher and administrator reports.

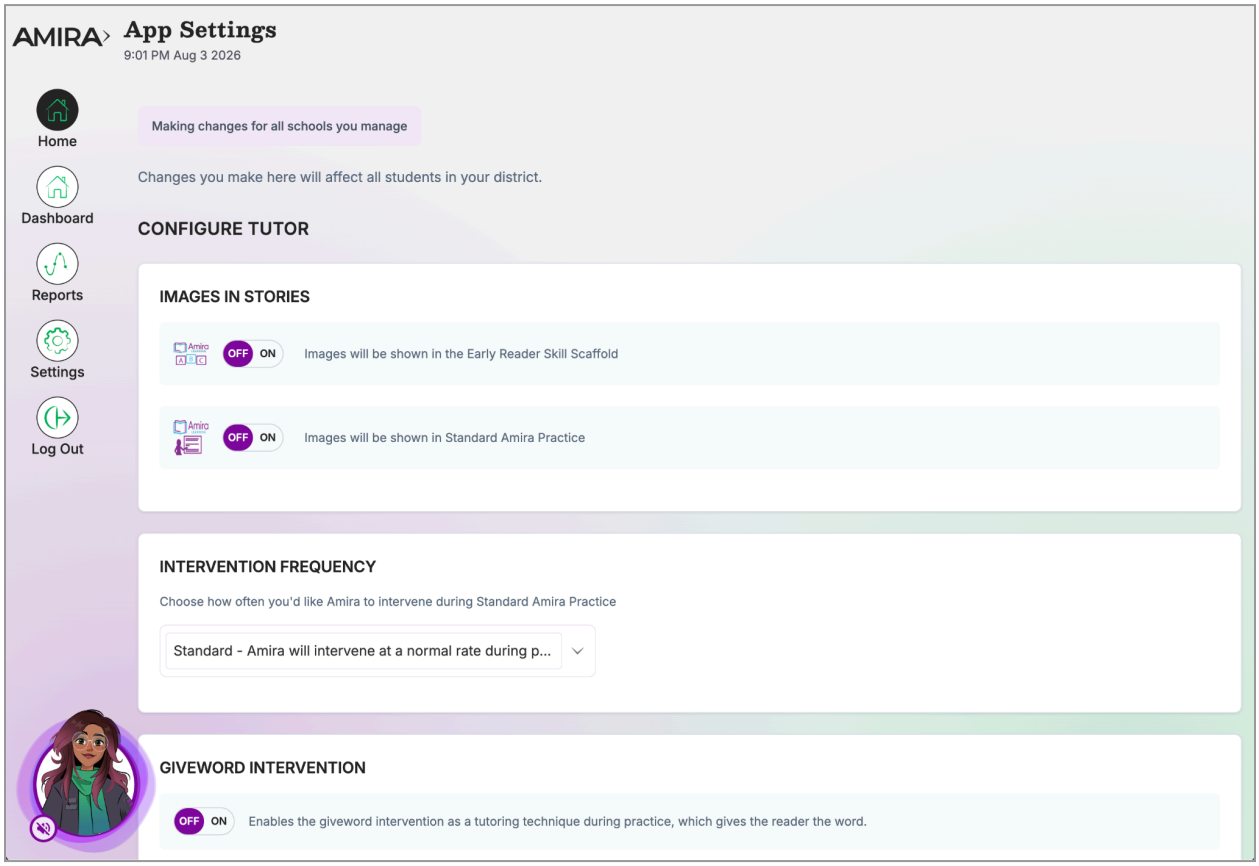

[View a walkthrough]

App Settings

The **App Settings** tile lets administrators adjust key settings for Amira Tutor/Tutora, Amira Instruct/Enseñar, and reporting features to align with district instructional goals and preferences.

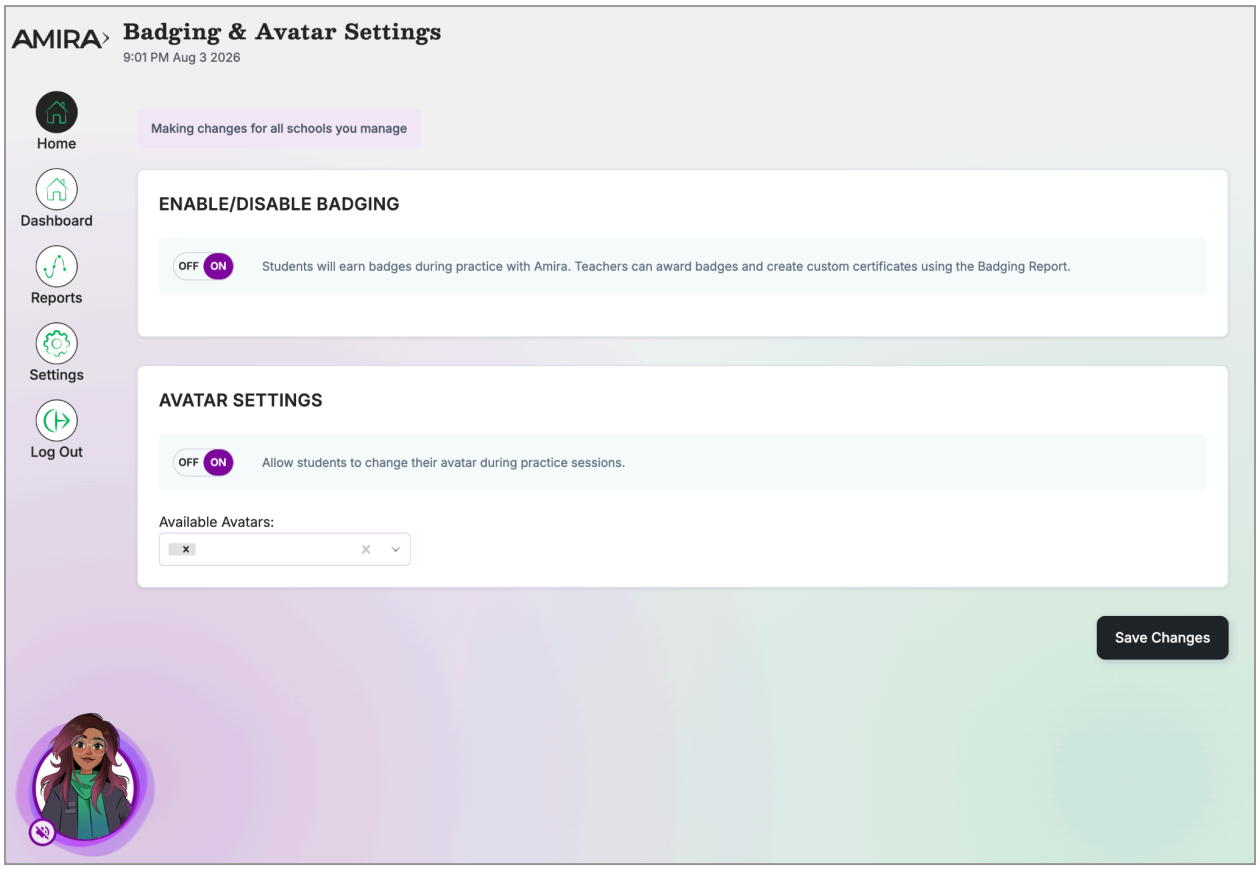

View a walkthrough

Badging & Avatar Settings

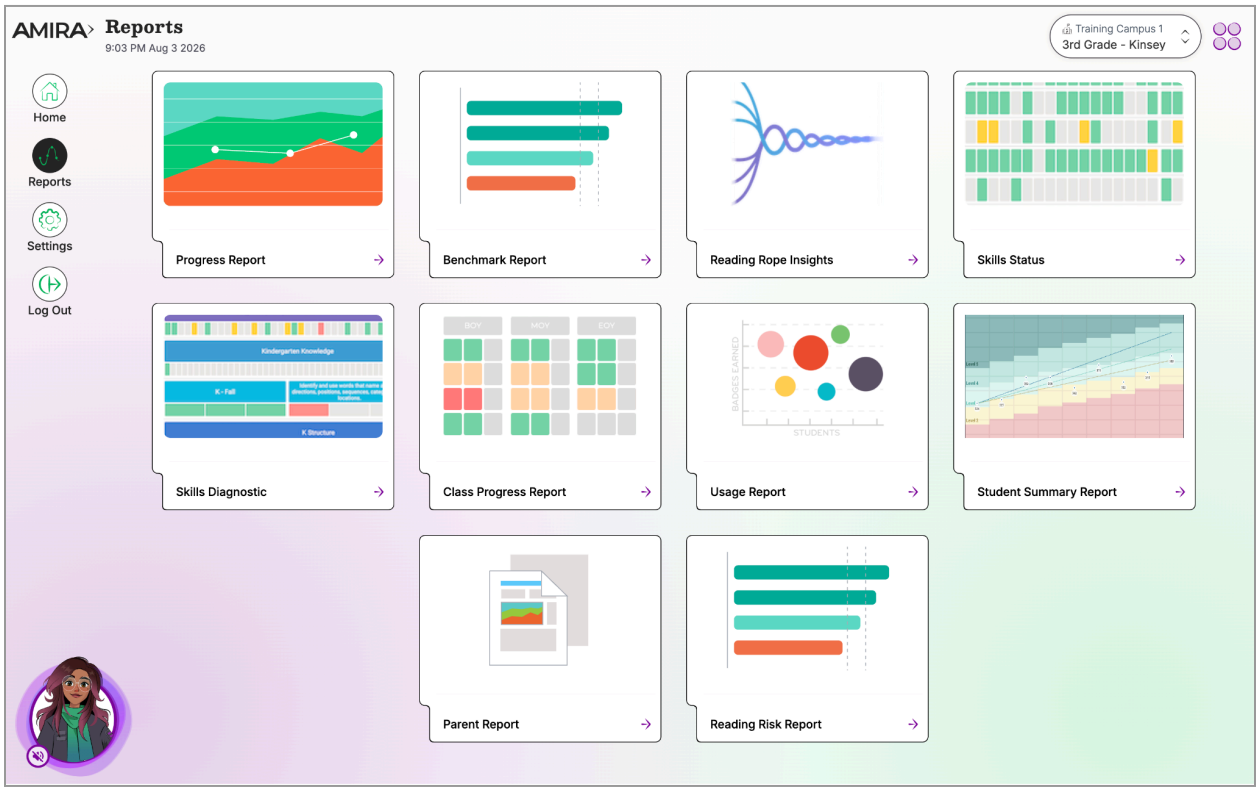

The **Badging & Avatar Settings** tile lets administrators enable or disable student badges during Amira Tutor & Tutora sessions and manage avatar customization options, including which avatars are available and whether students can change them.

TEACHER REPORTS

The **Reports** button within the Growth Dashboard opens Amira's Reports Dashboard, a centralized space offering eleven detailed reports on student reading performance. These reports let educators assess strengths, pinpoint growth areas, and track progress over time. Whether evaluating individual skills, monitoring class-wide trends, or preparing for targeted interventions, Amira's reports give teachers timely, meaningful data exactly when they need it.

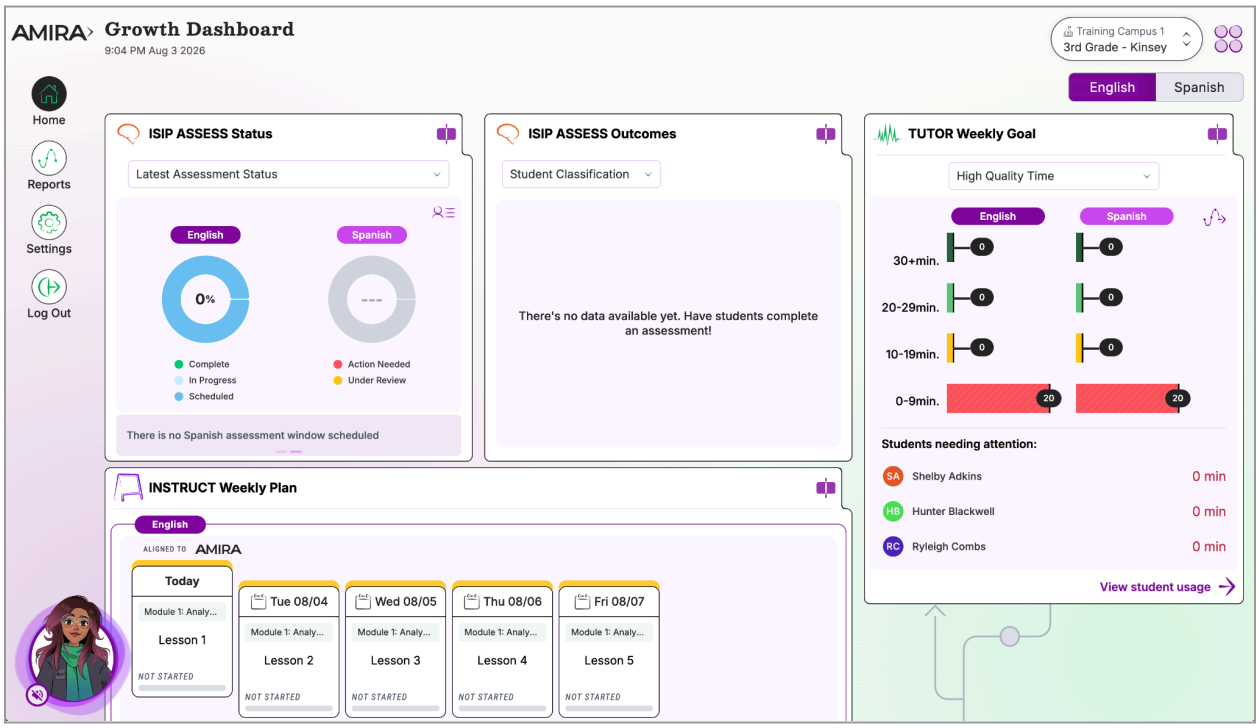

Growth Dashboard

The **Growth Dashboard** is the teacher's command center, uniting assessment data, tutoring engagement, and instructional planning in one interface. It turns student assessment and reading data into clear, actionable guidance, highlighting urgent needs and moments to celebrate, with real-time visibility into assessment status, tutoring participation, and upcoming instructional plans.

How to Use This Report: Teachers use the Growth Dashboard to stay on top of assessment completion, review performance results, and track usage of Amira's tutoring and instructional tools, then drill into specific reports to identify assessment results, skill gaps, and adjust assignments.

[View a walkthrough]

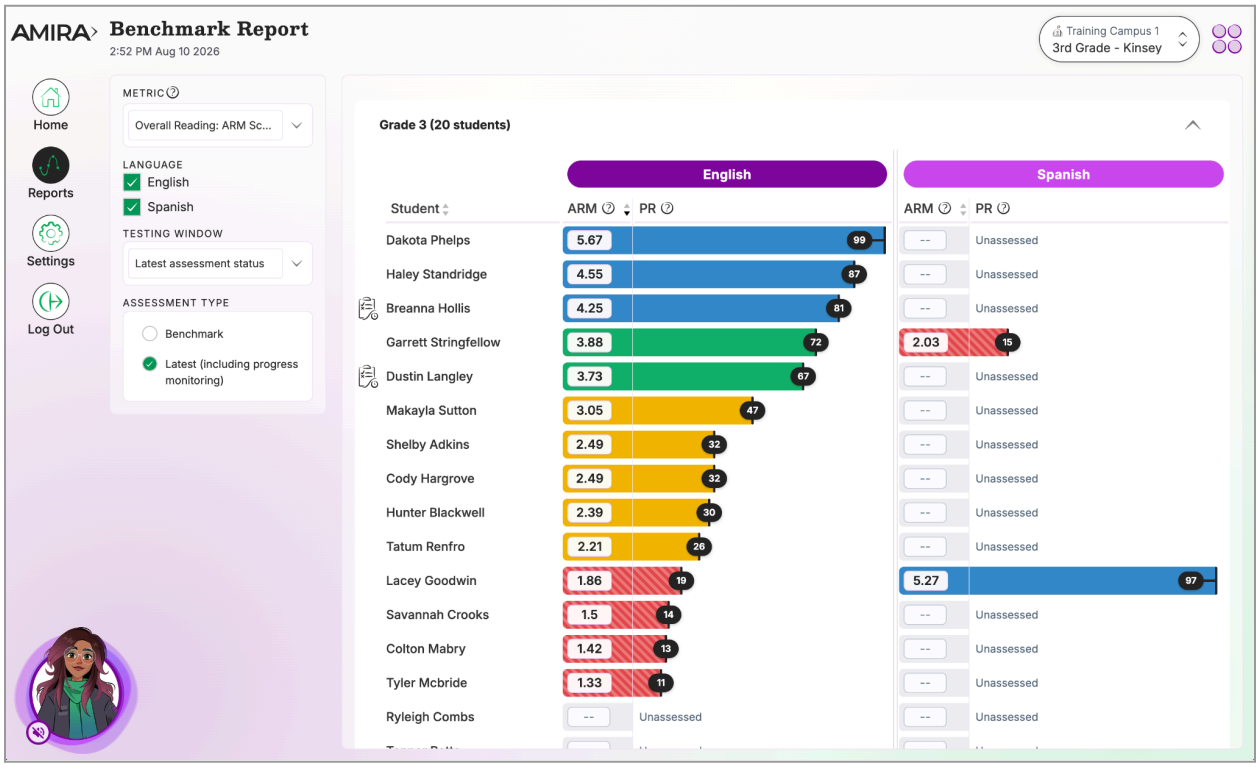

Benchmark Report

The **Benchmark Report** gives teachers each student's latest assessment results, including ARM score and Percentile Ranking, with a biliteracy view that displays English and Spanish results side by side.

How to Use This Report: Teachers use this report to view assessment results, pinpoint student performance relative to grade-level expectations, group learners for small-group instruction, and identify students who may need additional intervention.

View a walkthrough

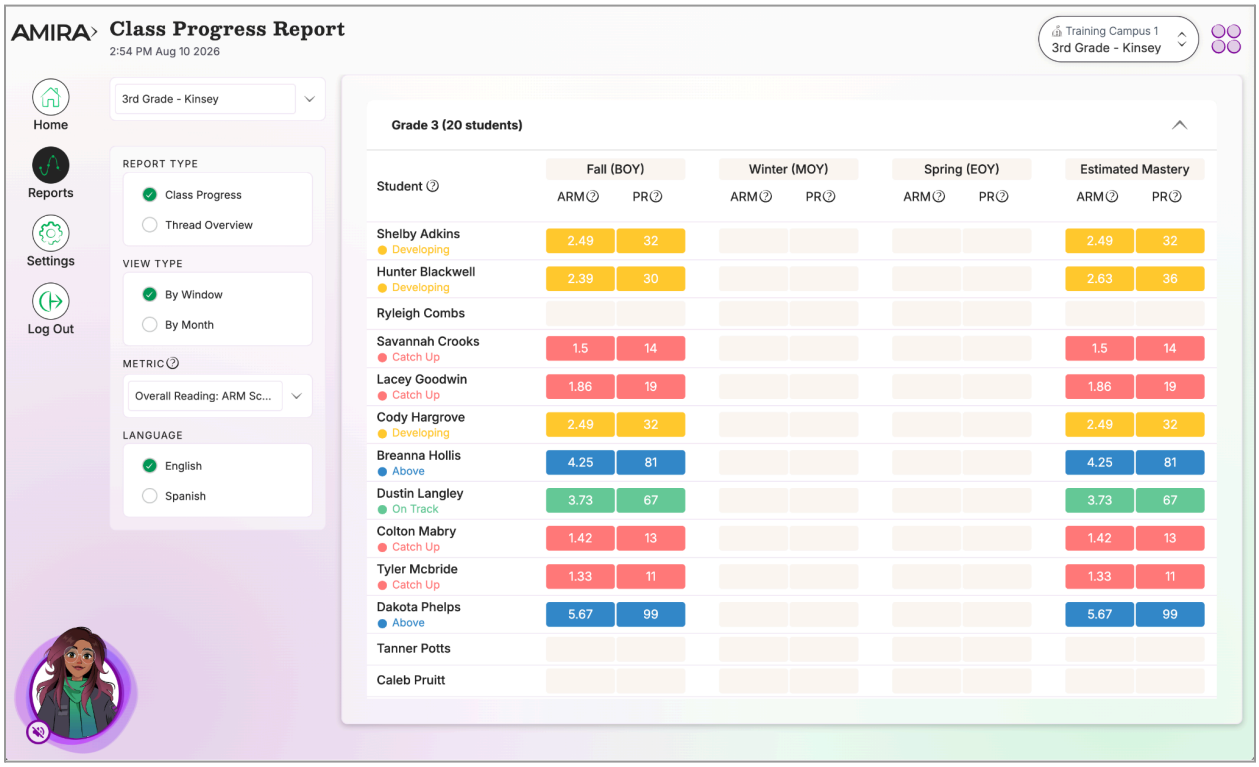

Class Progress Report

The **Class Progress Report** lets teachers view and compare assessment scores for every student in a class across the school year in one place, displayed by monthly assessments or by assessment windows. The report shows each student's ARM Score and Percentile Ranking, with a toggle to the Thread Overview, which breaks down the latest assessment results by Reading Rope strand.

How to Use This Report: Teachers use this report for a high-level view of class-wide performance, monitoring student progress and identifying trends and growth across the school year.

[View a walkthrough]

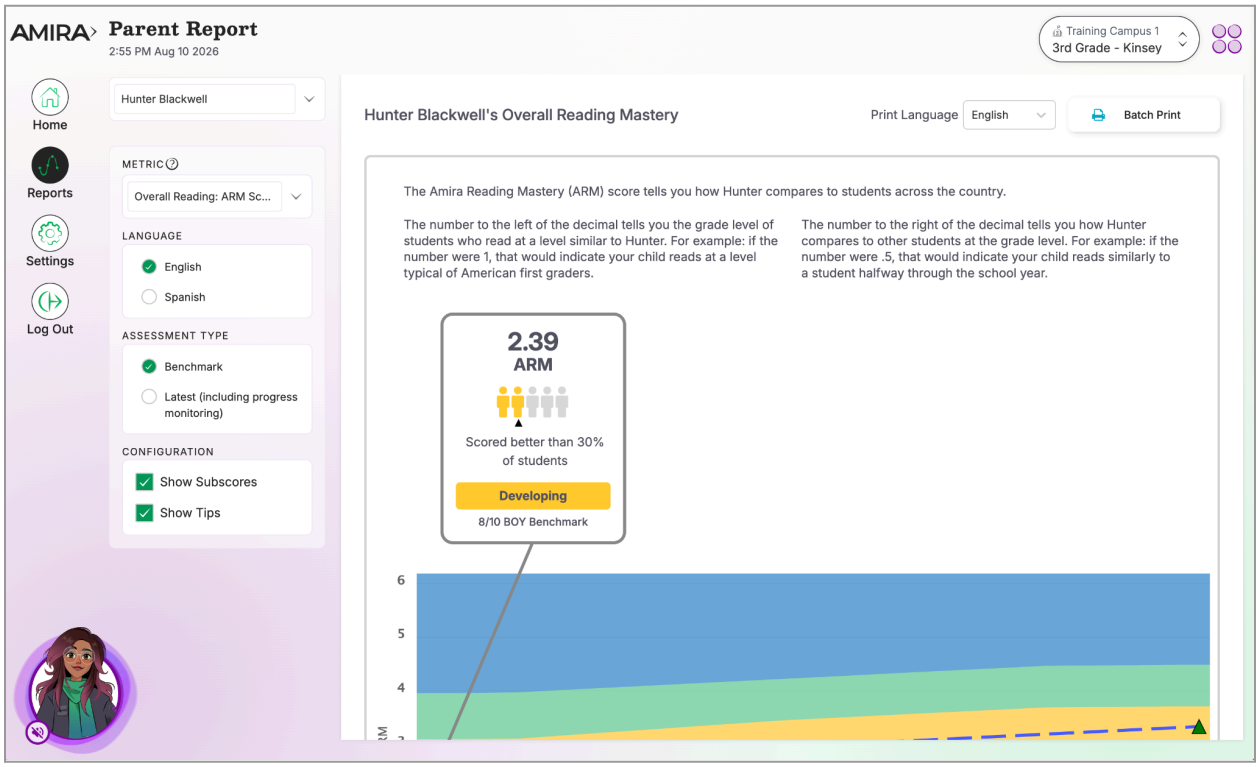

Parent Report

The **Parent Report** helps families understand their child's reading progress by sharing the latest Amira Reading Mastery (ARM) Score, percentile ranking, and reading subscores in accessible terms, along with tailored, actionable suggestions for supporting learning at home.

How to Use This Report: Teachers can batch print this report and use it during conferences or family communication to explain how a student is progressing across key reading skills — a valuable bridge between classroom learning and home support.

[View a walkthrough]

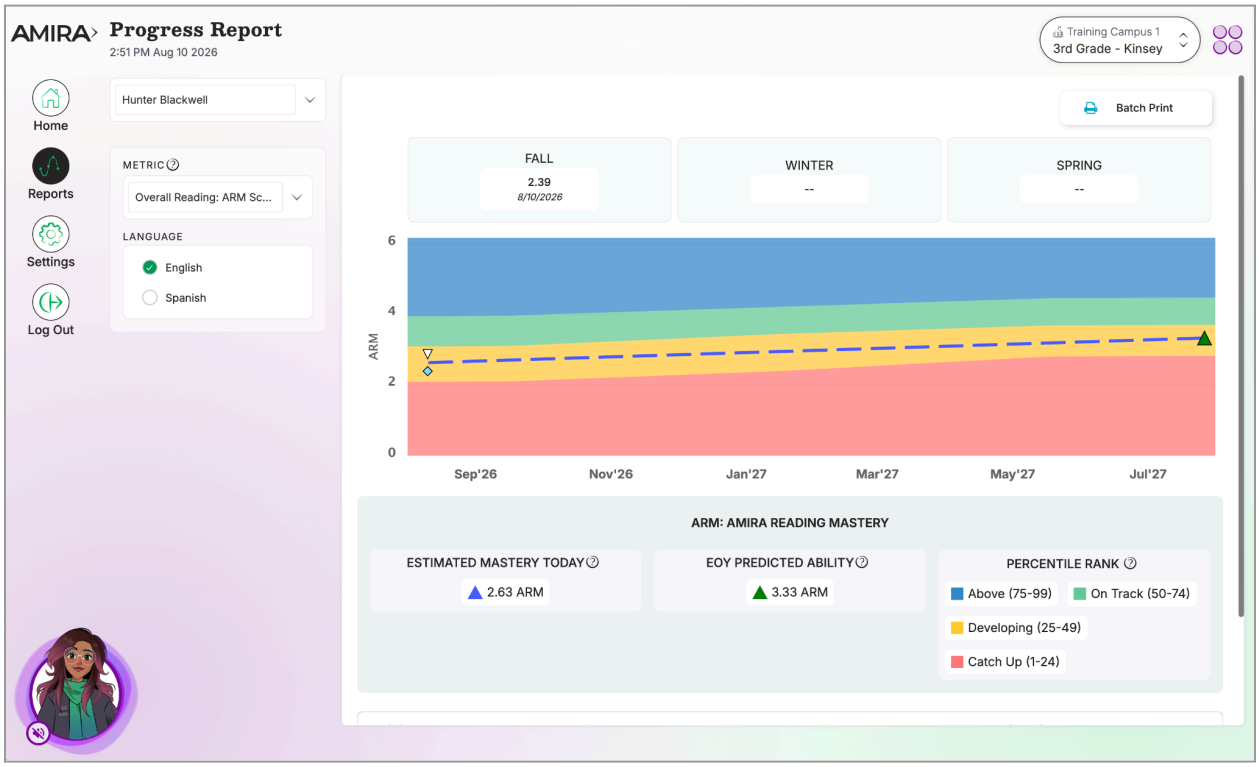

Progress Report

The **Progress Report** gives teachers a detailed view of each student's reading journey, highlighting overall and projected growth. Every practice and assessment session is plotted on an individualized growth chart with a projection line toward reading goals. Below the chart, teachers can view every passage read and click any passage to open a scored transcript and recording.

How to Use This Report: Teachers use this report to monitor reading growth over time, identify trends in performance, review specific reading sessions and recordings, and provide targeted feedback to individual students.

View a walkthrough

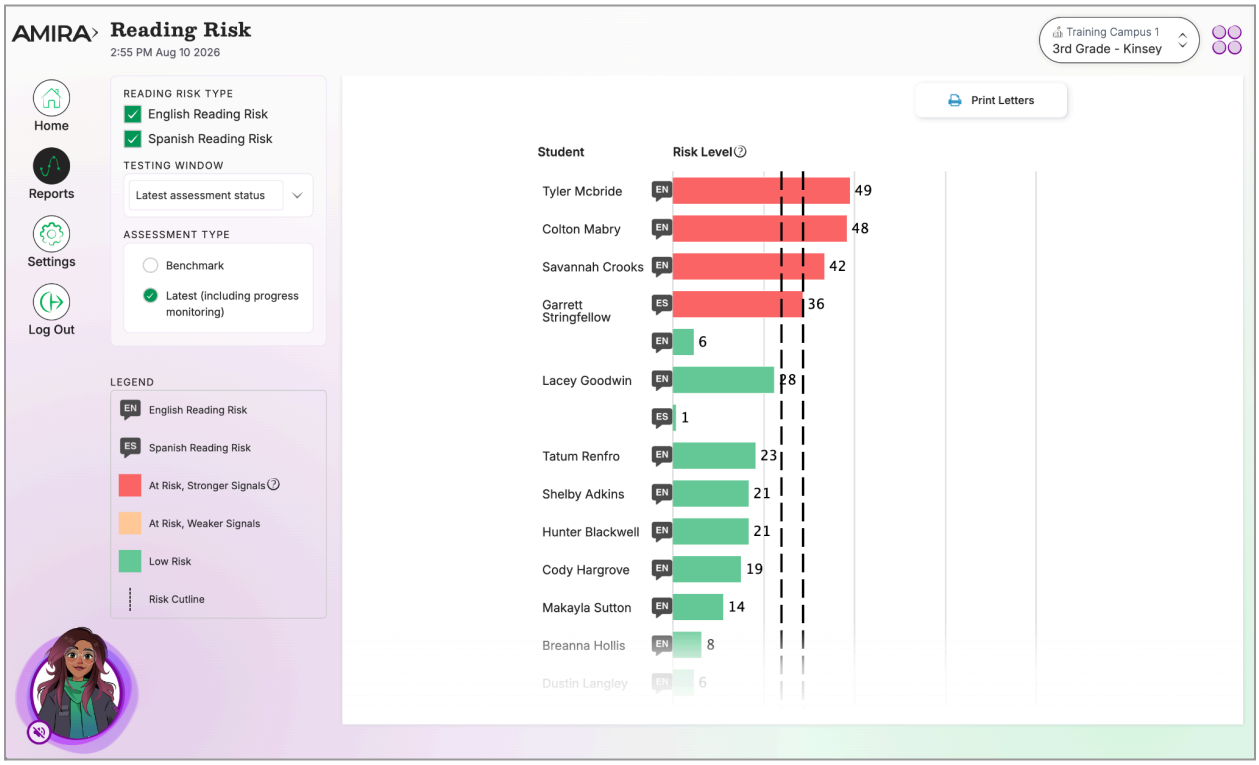

Reading Risk Report

The **Reading Risk Report** gives teachers an overview of students' risk levels for reading difficulties, including potential indicators of dyslexia. Drawing on data from the assessment, the report generates a Dyslexia Risk Indicator (DRI) score for each student — scores of 30 or higher are classified as At Risk, and scores below 30 as Low Risk. Amira does not diagnose dyslexia, but this report is a valuable early-warning tool.

How to Use This Report: Teachers use this report to quickly identify students who may be at risk for reading difficulties and prioritize them for additional screening, targeted intervention, or specialized support, helping ensure timely support and alignment with state risk-screening requirements.

View a walkthrough

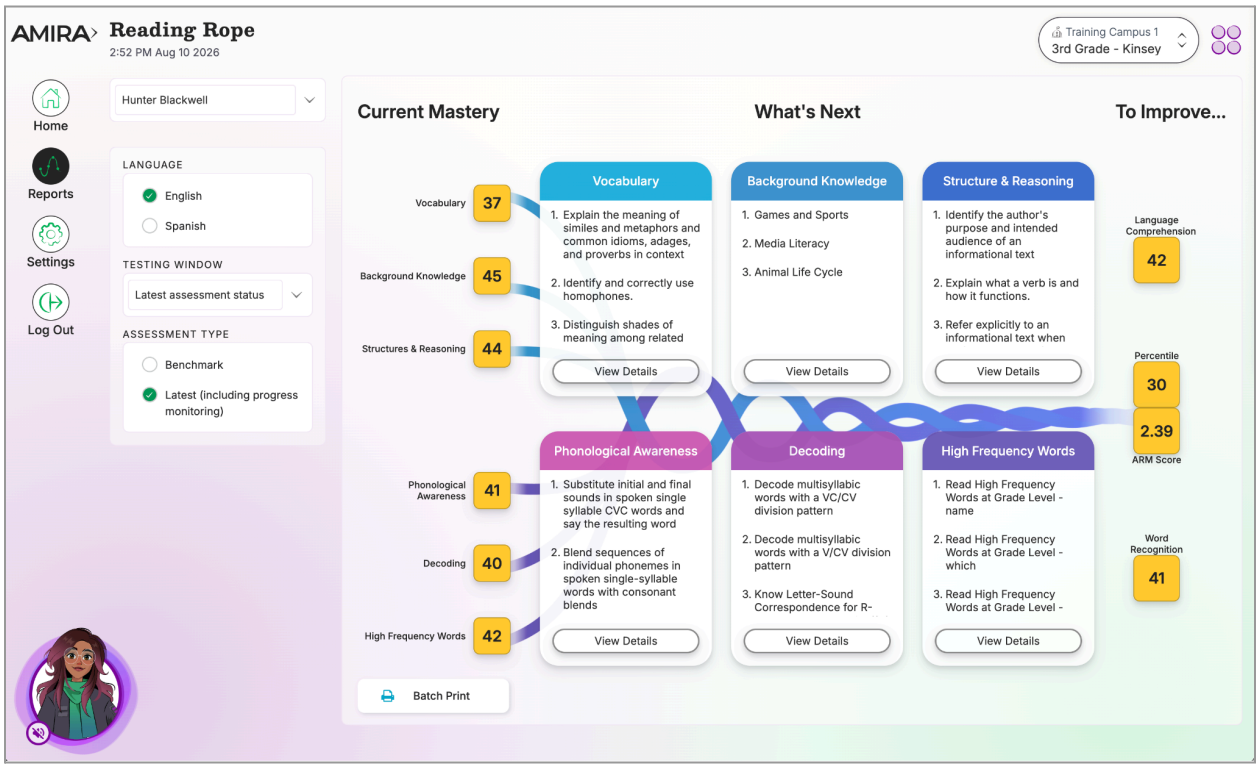

Reading Rope Insights Report

The **Reading Rope Insights Report** gives teachers an at-a-glance view of a student's reading abilities through the Reading Rope framework, displaying percentile rankings across six core components synthesized into overall Language Comprehension and Word Recognition scores, alongside the student's ARM Score and ARM Score Percentile Ranking. The report also includes instructional recommendations and targeted strategies tailored to each student's needs.

How to Use This Report: Teachers use this report to identify which strands of the Reading Rope need the most attention for a student, select targeted strategies to address gaps, and click "View Details" to open the Skill Diagnostic Report for detailed planning and intervention.

[View a walkthrough]

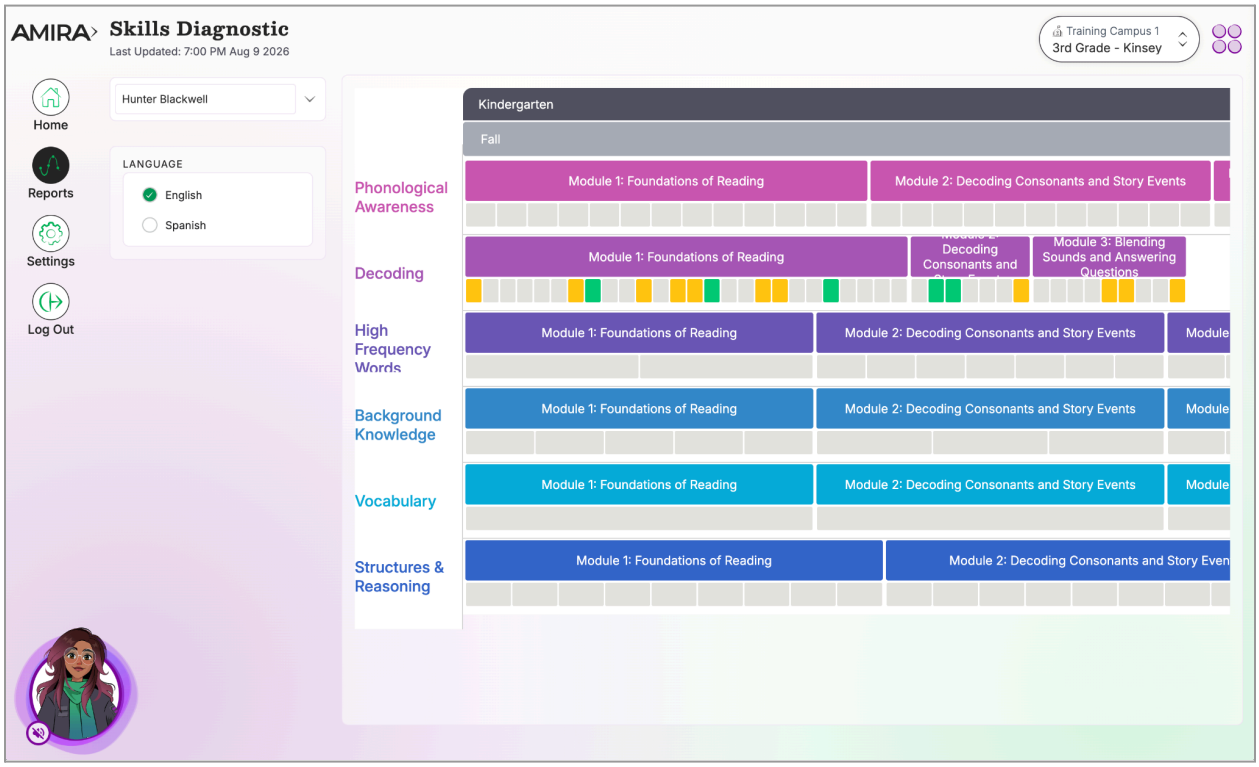

Skills Diagnostic Report

The **Skills Diagnostic Report** gives teachers a detailed, student-specific view of skill mastery across every component of the Reading Rope in one screen. Each box represents an individual skill, color-coded by mastery level; hovering reveals the skill description, aligned standard, and the number of observations and errors recorded by Amira.

How to Use This Report: MTSS teams, intervention coordinators, and teachers use this report to pinpoint specific strengths and skill gaps, click any box for instructional resources that support targeted skill development, and track how a student's reading abilities develop over time — ideal for goal setting, progress monitoring, and family communication.

[View a walkthrough]

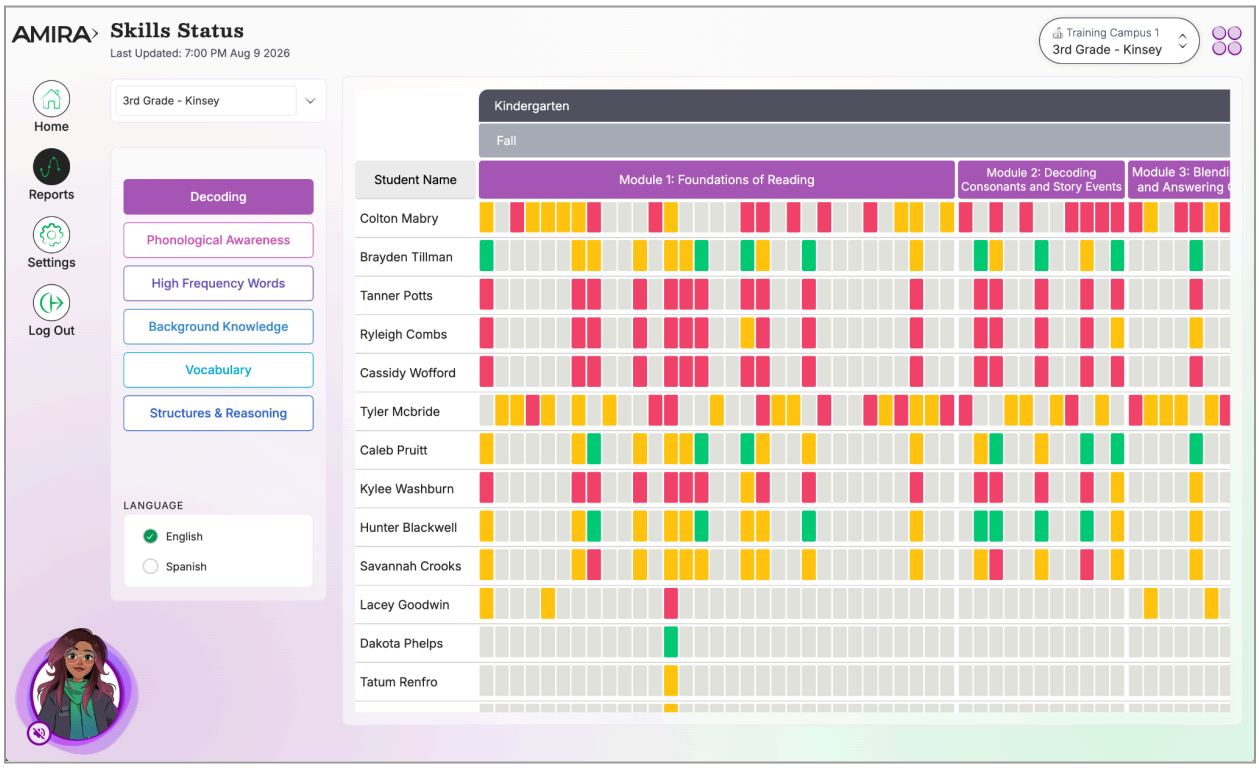

Skills Status Report

The **Skills Status Report** gives teachers a comprehensive view of class-wide skill mastery from Pre-K through 8th grade, with the option to focus on any Reading Rope component. Each skill appears as a color-coded box showing mastery level; hovering reveals a description, aligned standard, and the number of observations and errors recorded by Amira. The report updates automatically with data from every Amira reading session, practice or assessment.

How to Use This Report: Teachers use this report to group students by skill need based on real-time data, click any skill box for aligned teaching resources, and drag and drop student names to reorganize groupings for instruction or comparison.

View a walkthrough

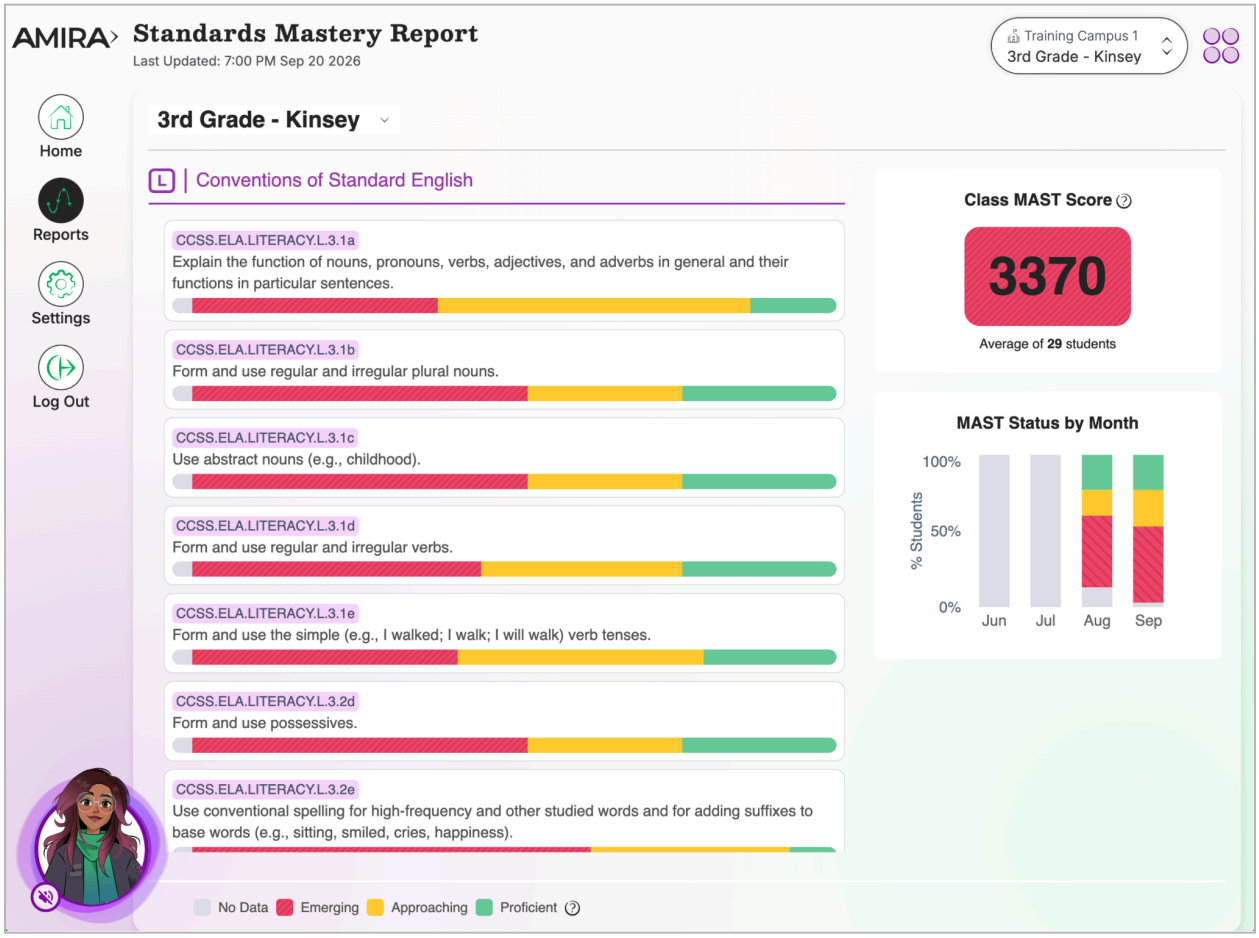

Standards Mastery Report

The **Standards Mastery Report** gives teachers a concise, standards-aligned snapshot of each student's progress toward mastering grade-level reading standards. Using Amira's Mastery of Academic Standards & Targets (MAST) score, it summarizes a student's current progress toward mastering the reading standards for their state and grade.

How to Use This Report: Teachers use this report to plan focused instruction, spot class-wide patterns, group students by mastery level, guide intervention strategies, and monitor growth over time.

View a walkthrough

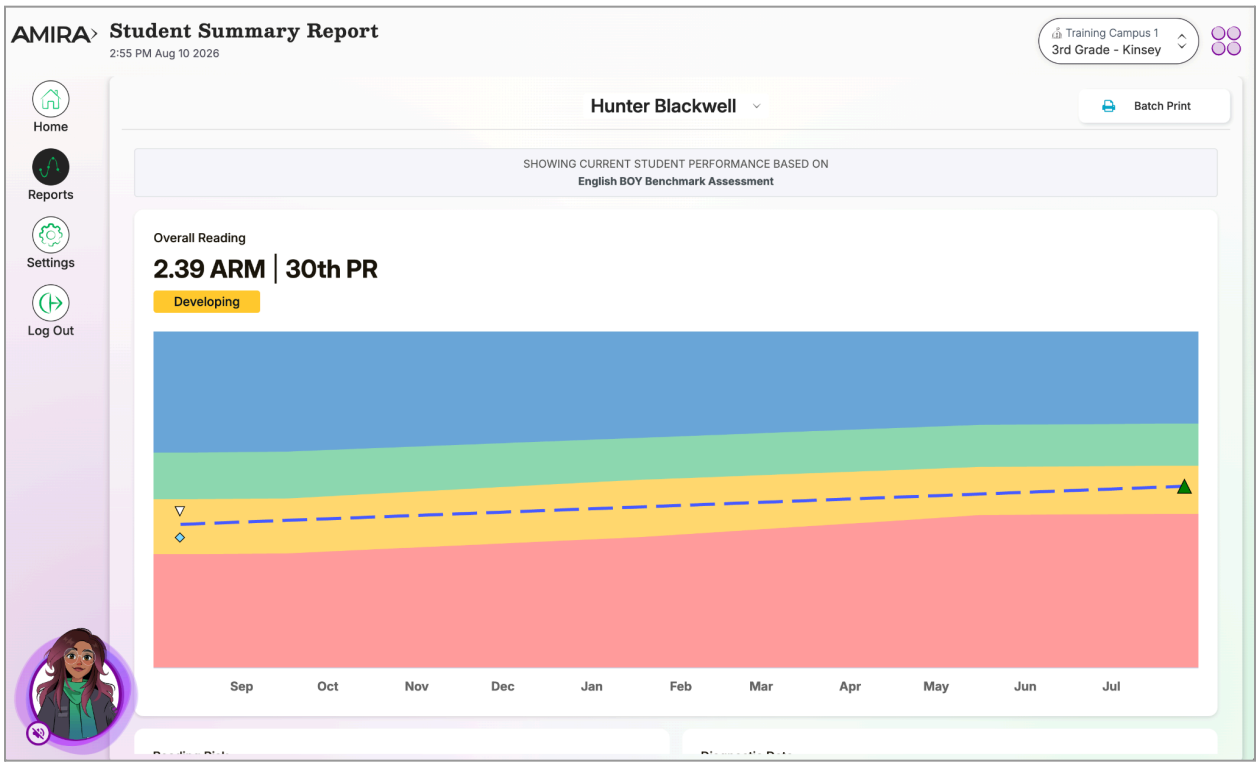

Student Summary Report

The **Student Summary Report** gives teachers a comprehensive, at-a-glance view of an individual student's reading performance and progress across key domains, designed to support decision-making within RTI/MTSS frameworks. It also includes scores from any Subtest On-Demand Assessments the student has completed.

How to Use This Report: Teachers use this report to quickly identify strengths and potential risks and access deeper diagnostic tools — ideal for parent conferences, instructional planning, or collaboration with specialists.

View a walkthrough

Usage Report

The **Usage Report** gives teachers a weekly snapshot of student engagement with Amira, with a detailed breakdown of practice and instructional activities: total tutoring time for the week, number of stories read, instructional activities completed, minutes spent on each activity type, and badges earned for reading milestones.

How to Use This Report: Teachers use this report to monitor usage, celebrate progress, identify students who may need encouragement or support to stay on track, and award digital badges to students who reach weekly goals.
