AMIRA LEARNING

Reading Blizzard

How It Works

1 Choose how to build your class blizzard

Choose one way for your class to earn snowflakes:

Students contribute individually: Each student earns one snowflake when they meet their weekly reading goal. Add everyone's snowflakes to the class blizzard. If 18 students meet their goals, the class adds 18 snowflakes that week.

The class earns together: Set a shared class goal, such as 80% of students meeting their weekly reading goals. Each week the class meets that goal, add one snowflake to the class blizzard.

2 Decide how to win

Most snowflakes: The class with the most snowflakes by the end date wins.

First to the goal: The first class to reach a set number of snowflakes wins.

Work together: Combine snowflakes toward a schoolwide goal and celebrate when you reach it!

3 Track and celebrate

Each week, check progress, add earned snowflakes to each class blizzard, and update your tracker. Celebrate effort and progress along the way!
